

Dear all,

As we continue to all face this unprecedented COVID-19 situation, we are working closely with all our customers, tenants, supply chain, construction managers and the wider community to ensure we are navigating the challenges faced as effectively and appropriately as possible.

Since the start of the outbreak, we have worked hard to ensure we follow government requirements and guidelines with the health, safety and well-being of our visitors, and those living and working at Battersea Power Station, being our top priority. So with that in mind, we are taking every measure to ensure your safety, whilst ensuring both Circus West Village and the development of the Power Station and Electric Boulevard continue to run as well as possible throughout this period. We have robust plans and procedures in place to ensure we remain resilient and continue to provide all of our customers and stakeholders with a high-quality service.

Following the temporary closure of the construction site on 24 March, we spent a number of weeks working together with our construction managers, Mace and Sir Robert McAlpine, to test and develop new site processes that fully comply with the COVID-19 site operating procedures published by the Construction Leadership Council and aligned these with the latest health and safety guidance from Public Health England. We now believe we are able to get people back to work on site safely and in a measured, responsible manner. As of 4th May, we have therefore begun a gradual and phased reopening of the site.

As the situation continues to evolve, please check with each of our individual retailers regarding closures and/or delivery options. In the meantime, we hope you are enjoying our online fitness options and educational boredom busters for families that are available in the Stay Connected section of our website.

On behalf of all at Battersea Power Station, I hope that you and your families remain safe and well. We will be in touch soon.

Kind regards,

Simon Murphy

CEO of Battersea Power Station Development Company (BPSDC)
